## LLG-Desiccant Drying Agents, silica gel, self-indicating

With orange indicator colour. Grain size 1 to 3 mm or 2 to 5 mm. The gel is naturally orange when active and at a 6 weight-% saturation level. As the gel adsorbs moisture, the colour develops into a dark shade. The range of application is identical with that of white silica gel. The colour change, however, represents a great advantage since it allows monitoring of the saturation level. The gel can be regenerated when heated at a temperature of maximum 120 °C until it turns to its original orange colour.

## Adhesive Mats Sticky Mat

The Sticky Mat provides a fast, convenient, reliable way to clean shoe soles or other items before entering a clean and sanitary area. Sticky Mats significantly reduce traffic-borne contaminants.

Each Sticky Mat consists of a stack of tear-off adhesive polyethylene sheets, effectively capturing dirt and dust from foot-traffic and equipment wheels before they enter controlled environments. A clear release sheet protects the top sheet of the sticky mat until it is ready to use. The corner tabs are consecutively numbered to show the number of remaining sheets.

Sticky Mats are produced in an 46 x 114 cm sheet, sold in pads of 30 sheets, with 10 pads per box (300 sheets total.)

## Gel Electrophoresis Tank MultiSUB Mini DUO

## Gel Electrophoresis Tank MultiSUB Midi DUO

**! Top Price**

The MultiSUB Mini DUO is the smallest unit in the range, designed for low to medium numbers of samples. The cost-effective small gel size does not compromise versatility as two tray options are available: 7 x 7 cm and 7 x 10 cm. Easy preparation up to 16 samples. Simply by altering the gel tray or comb, this compact unit is capable of resolving up to 64 different samples, prepping 1 ml of sample or separating sample bands over a distance of 9 cm.

### Scope of delivery:

MultiSUB Mini DUO: 7 x 7 cm and 7 x 10 cm UV Tray, 2 x 8 sample combs.  
With additional loading guides and dams.

### Specifications

Gel dimensions (W x L): 7 x 7 cm and 7 x 10 cm  
Unit dimensions (W x L x H): 21 x 9 x 9 cm  
Max. sample capacity: 7 x 7 cm tray, 32 samples  
7 x 10 cm tray, 64 samples  
Buffer volume: 225 ml

With gel tray options of 10 x 7 cm and 10 x 10 cm, the MultiSUB Midi DUO has been designed for routine horizontal gel electrophoresis. Extending only the width of this unit allows more samples to be resolved per gel, than the MultiSUB Mini, without a significant increase in buffer or gel volumes. A maximum of 100 samples per gel can be resolved making this unit ideal for those routinely checking medium numbers of samples over short to medium gel run lengths.

9.264 101

9.264 102

9.264 103

The sorbents have a high performance. Due to their new microfibre structure, they provide very high absorbing capacities. The light and absorbent material is easy to use and committed to absorb quickly and store the liquid. The absorbed liquid can be extracted, to be used again or to be disposed of separately. The optimal combination of features such as lightweight, low volume, very high absorbance, easy handling and low sorbent disposal weight, significantly reduce disposal costs in comparison to conventional binding materials. To reduce the final waste content, the used sorbents can be burnt.

Can be used to absorb a variety of lab chemicals:
